Technical Data Sheet

In-line full flow lever valve with brass barb connectors (1"-25mm)for hose

This product is a nickel-plated brass lever valve that is installed in-line with a pipe and comes with two brass hose barbs in various sizes. Its purpose is to regulate the flow of water in the connected pipe or to turn the water on and off. The valve is designed to allow for full flow, meaning that it does not interrupt the water flow, resulting in a consistent water output. The lever on this valve is made of metal and can be easily operated with a quarter turn from fully on to fully off. It requires less strength to operate than traditional turn handles. The brass hose barbs are designed to fit securely into the pipe and are resistant to snapping, even under pressure. This product is perfect for use in garden irrigation systems, ponds, and fountains.

Brand	Cost Wise
Colour group	Gold
Material	Brass
Pack quantity	1
Product height	90mm
Product length	180mm
Product weight	440g
Water regulations	No certification
Demountable	Demountable & reusable
Equal/reducing	Equal
Lead-free	Lead-free
Product code	50565961382525

Shut Off Valve –25mm

Specifications

Material	Gun Metal / Stainless Steel
Size	19 mm / 25 mm
Inlet	Serrated Male For 20mm / 25 mm Hose
Working Pressure	10 Kgs. / Cm2
Test Pressure	14 Kgs. / Cm2
